

Setting up Student Chromebook

Once a student has an assigned device they will need to be added as a user for that device.

Power on the Chromebook. If it doesn't power on right away hold the power button down for 10 seconds.

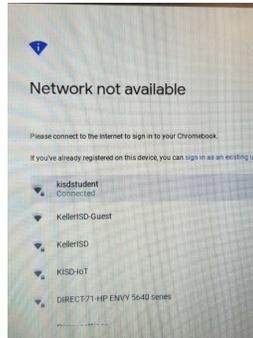

Click "Add Person"

You will be directed to add an available wireless network.

Click on the wi-fi network that you will be using.

**If you do not have a wi-fi connection at your home please contact DOTS (Department of Technology Services) @ 720-423-3163. You will not be able to add a student unless you are on wi-fi.*

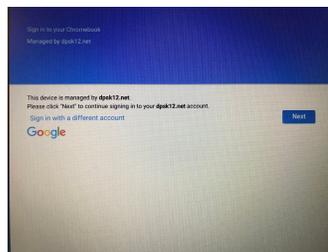

Enter the password for the wi-fi you will be using.

Then click "connect".

Click Next

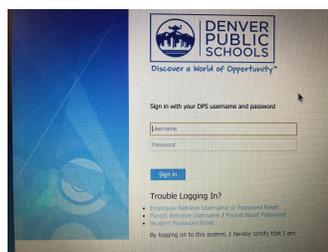

This may take a minute.

Enter the student Username and Password.

Username: This is their 6 digit Student ID# ex. **123456**

Password: This is your students 8 digit birthdate.

<p>Example: If your child was born on December 22, 2010 the password will be 12222010</p>	
<p>Click on “Sign in”</p>	
<p>This should automatically log you in and open a Google Page.</p>	
<p>Next time you log in you will only need to use their password.</p>	

Troubleshooting

Access Denied

If student access is denied, it means that you opted out of using Google at school registration. If this is the case you will need to contact DOTS (Department of Technology Services) at 720-423-3163
